

FRP Access/Work Platforms

Nonconductive, light weight – high strength SC-R platforms are made to measure and comply with AS 1657:2018; Fixed Platforms, Walkways, Stairways and Ladders- Design Construction and Installation.

SC-R Platforms are made entirely from FRP materials including; C-shapes, angles, grates, stair treads and handrails, that combine to an FRP system to provide the ultimate in corrosion resistance , safe and versatile access and are non-conductive for use in electrical substations and the power industry in general.
