

FRP PLATFORM SC-R™

Tailor made FRP solutions
for a large range of
industries since 2004

STAIRCAREFRP
COMPOSITE DESIGN & FABRICATION

FRP PLATFORM

Staircare SC-R is a specialist FRP Engineering Company, offering solution based composite fibre reinforced polymer (FRP) design and fabrication services across a large range of industries since 2004.

■ **FRP Platforms, Decking or Cross Overs** combine SC-R Grating, Stair Treads, Structural Shapes and Handrails into an **FRP system** that provides safe and versatile access. Made from **FRP composite material** they provide the ultimate in corrosion resistance. During the manufacturing process silicon carbide is incorporated to form an inseparable gritted surface on decking and stair treads to offer maximum slip protection. Our structures are designed and built to comply with Australian and International standards. Staircare SC-R platforms range from delicate penguin nesting stands, pipeline cross overs, access platforms, heavy duty pump station decking, to roof top walkway and air-conditioning support stands. Our design, manufacture and supply service can include engineering sign off, design and as build drawings.

■ **Staircare SC-R Modular Platforms** can either be built to your specification or we offer our design and fabrication service. FRP work platforms or instrumentation stands are non-conductive, non-magnetic and have no thermal conductivity with exceptional chemical and corrosion resistance.

■ **Staircare's FRP structure** design and fabrication processes are operated in close consultation with our clients to ensure satisfaction throughout all stages of initial concept to final completion. These structures are made to comply with relevant Australian standards and our products have been tested both in-house and by external professionals. By doing so, we are able to have complete confidence and assurance in the products we provide. At Staircare, we are constantly refining, upgrading and improving our existing products to ensure we are providing a high quality service. Robust structures can also be delivered to locations complete or in manageable components for assembly on site, depending on your needs.

■ We understand that client satisfaction is the key to our successful operations. We endeavour to consistently provide products and services that meet or exceed the requirements and expectations of our customers. We will actively pursue improving quality through programs and the correct tools that enable each employee to do their job right the first time and every time. We value our clients and believe that repeat business is the best business.
